

Helping Community Agencies Do More

AmeriCorps Community Corps Can Help

What is AmeriCorps?

AmeriCorps is a federal program that brings people together through national service to address the most pressing issues in our nation's communities. This is accomplished through a variety of programs and an extensive network of staff at the national, state, and local levels.

What is the focus of the Community Corps AmeriCorps program?

The purpose is twofold. First, to help organizations increase their capacity to address pressing community health needs, and second, to support the recruitment, training, and development of the next generation of public health leaders.

"Our AmeriCorps members bring fresh eyes to our work each year and with that brings great change and growth for the organization and those we serve."

"I'm proud to be serving because I get to make a difference in my community and learn new things. ... I've gotten to meet and work with a lot of amazing people."

- Emily E., AmeriCorps Member

Tell me more about Marshfield Clinic's AmeriCorps program!

With 25 years of experience and countless hours of service, Marshfield Clinic Health System (MCHS) hosts one of the largest AmeriCorps programs in the state. Community Corps, provides Wisconsin organizations the opportunity to host an AmeriCorps member thereby increasing their capacity to address the current health needs in their community.

Many organizations use the increased capacity to work on projects that target health improvement in the following areas:

- Food insecurity
- Mental health
- Alcohol and drug misuse
- Health disparities
- Healthy growth and development
- Environmental health issues

Community Corps allows individuals to gain hands-on, impactful experience, and provides communities with the help they truly need.
